#### Wine description

Les Pierres Dorées is an exciting project which has seen Latour recognise the potential for the Pinot Noir vines in a region that has traditionally been planted with Gamay. Located north-west of Lyon, the Pierres Dorées lies on undulating hillsides amongst 39 villages. Its clay and limestone soils are very similar to those found in Burgundy. They are composed of a crinodial limestone, marl from the Early Jurassic period and a clay-limestone mix. This very specific terroir allows the Pinot Noir to reveal all its elegance and richness.

#### Tasting note
